The Board of the EFPC

Report of the Audit-Committee, Presentation to the board of European Forum of Primary Care

The financial report for the financial year 2022-2023 as of 30/06/2023 has been presented to the audit committee in late August 2023.

The audit committee has reviewed the provided data and discussed the results on September 6th. The provided data is plausible and provides a true and fair view of the EFPC's financial position as at 30 June 2023 and its financial performance for the year.

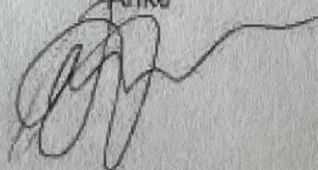

The new accounting system allows a much more accurate and transparent documentation of the financial records. Also new ways of financial analysis are now possible.

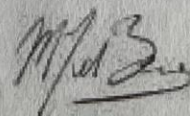

The following remarks and recommendations are presented to the EFPC board and are to be discussed at the General Assembly in September 2023:

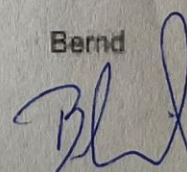

As cost and provided services are increasing and there is a need to build reserves new ways of income are to be found. We recommend:

- Increase of income by higher membership fees of organisations
- Increase in conference fees for all participants (no more free passes for members)
- We support negotiations with foundations as longtime or sponsors or project partners

While we understand that increase of fees or stopping the free passes may not be popular, it is a responsible and necessary step to avoid potential financial problems in the coming years. Such measures enable us to continue to provide the high-quality conferences and resources that our members value while also safeguarding our ability to invest in future growth. Members support in this matter will help us secure our EFPC's financial health for years to come.
